ABOUT AMP GROUP.

SUPPLY CHAIN MANAGEMENT AND POWER PROTECTION SOLUTIONS.

AMP Group was formed in 2016, with a vision to enter government procurement, offering a cost effective delivery model supported by unrivalled quality control measures to ensure total fulfilment at every touch point.

AMP Procurement was born to push the boundaries of supply chain management, quickly disrupting the 'norm', and creating dynamic solutions that our clients demanded for cost efficiencies, response times and overall project management, principally within the defence sector.

OUR VALUES DEFINE US.

NOTHING IS IMPOSSIBLE.
EVERYTHING IS POSSIBLE.

AMP have quickly developed a reputation of rapid response while continuing to ensure the highest standards of product quality. We strive for perfection at every opportunity, knowing that our customers rely on our stringent processes to supply their lines correctly - without fail.

AMP's director led approach is fundamental to the service model, leading from the front and providing added value to our customers, while procurement managers focus on the day to day supply chain, resolving issues as they arise and communicating at all times with buyers and key contacts.

Our team understand our brand and the desire for getting the job done. We know that every challenge is an opportunity to succeed, and we empower them to do so.

EMPOWERING PEOPLE.

DELIVERING ON OUR PROMISES
& YOUR NEEDS.

We understand the need to get procurement right, because we also understand that errors are costly.

Our strict quality control checks and document management systems ensure that our team are empowered and equipped to make decisions, knowing that orders are fulfilled, correct and absolute. We take full ownership of the entire process, delivering on our promises - often before our competitors have even quoted.

*"Process driven to guarantee 'in-time'
and 'just in-time' deliveries."*

AMP PROCUREMENT.

SUPPLY CHAIN MANAGEMENT POWERED BY SOLUTIONS.

AMP Procurement have become key solution providers to the Naval, Defence & Maritime Industries, Rail, Road & Sea Industries and Utility Providers, along with many Blue Chip Companies.

Our procurement solutions are enhanced by AMP Power Protection, enabling bespoke design and build of ruggedised UPS to exact requirements, customised to specific needs.

From basic components to complex enquiries, AMP Procurement have earned an established reputation for high performance solutions that ensure our customers' projects don't stop.

AMP APPROACH.

Traditionally, procurement relies on the engagement of the buyer to negotiate the best product and price of required lines. This process is demanding and repetitive often resulting in supply of products and equipment that are not suitable for their specific requirements.

AMP Procurement believe that by taking ownership of procurement specifics, we can deliver a more efficient service.

We assess engineer requirements by communicating directly with them and develop total understanding of the needs of the project, product and engineer.

This enables us to negotiate fully on our clients behalf with total understanding of the solution that is required, delivering product lines to our clients that meet agreed price and lead-times, and critically ensure projects don't stop.

WAREHOUSE.

WAREHOUSING AND TOTAL QUALITY CONTROL.

AMP Procurement have built a reputation for efficiency and reliability. We understand the critical need for product lines to be delivered not just on-time, but correct and with documentation that is complete.

Our 2500sq' warehouse in Central Scotland facilitates storage of product lines to be called off for projects for 'in-time' and 'just-in-time' delivery, and also operates as our quality control hub. We never assume correctness in product or documentation and have developed a quality process that makes certain lines arrive seamlessly and correct for every order.

Our team are trained to understand key client requirements and empowered to make decisions and intervene when required, creating a procurement service with pride built within its foundation.

TAIL SPEND MANAGEMENT.

PROCUREMENT EFFICIENCY ELIMINATING FRAGMENTED SPEND.

At AMP Procurement, an important part of our supply chain services is Tail Spend Management; working with customers to reduce tail spend across the business as a whole. We work closely with suppliers to bring consistent service and materials to the end consumer, whilst driving down costs.

AMP has built a reputation with our clients of offering a value for money approach, flexibility and quick to react, but also ensuring the highest standards of product quality. We use the latest sourcing tools, best practices, tactical sourcing, and a growing supplier database – a full range of tools, to provide a highly effective buying experience to users. The result is a highly tailored solution for tackling one of your biggest sources of incremental savings available.

We work with you and your supply chain leads to bring about the required tail spend objectives in both a highly effective and professional manner.

Cost reductions from 5% to as high as 20%

Increase control over organisational spend

Increased process efficiency

Reduced risk across the supply chain

Improved organisational compliance with procurement processes

Increased visibility across the procurement process

Improved management of suppliers

PROTECTED UNINTERRUPTIBLE POWER.

HIGH PERFORMANCE ENGINEERING SOLUTIONS.

The purchase of Harland Simon UPS Limited into AMP Group brings the ability to design, supply and support high performance rugged harsh environment UPS and Power Protection solutions with a wide range of products from COTS to MOTs to Custom ensuring we can fulfil any requirement.

We supply Rugged Protected Power Protection Products and Uninterruptible Power Supplies (UPS), ensuring your critical sensitive equipment keeps operating safely, no matter what happens.

We have over 20 years experience in most industries and applications including: Naval, Army, Marine, Petrochemical, Transport & Utilities.

SITE SERVICES.

UPS MAINTENANCE AND REPAIR.

Our service and maintenance products offer complete and customisable pre and post sales service support which alongside standard warranties will ensure total protection for critical equipment.

A UPS relies on various technologies from detailed electronics through to the simple fan. All of these require maintenance to ensure your UPS continues to supply the uninterrupted power you need. Failure of your UPS can be critical – shutting down a department or the entire business. With engineers based all over the country the response time to failures can be guaranteed as low as 4 clock hours.

As well as standard options we can adapt our service plans to meet your specific application. Choose from a range of standard plans covering preventive maintenance through to 24hrs, 365 days a year, guaranteed response contracts. Ensuring that your UPS is regularly maintained is vital.

GLOBAL REACH.

AMP Group benefits from strategically positioned operational locations world-wide, further establishing our relationships with clients and key suppliers, while ensuring project management at every stage.

The development of offices in Adelaide and Perth to engage with Australian distributors and manufacturers, are perfectly positioned to support its partners at BAE Systems Australia, and soon to be complemented with footholds in the USA and Canada.

*"Key position leverage, ensuring best solution
guarantees on pricing and specific delivery needs."*
